SEA BULK® DUMPSTER LINER

This dumpster liner is specifically designed for the loading of fine particle industrial waste. It will contain the material and prevent any dusting or contamination to the environment during loading and during transport for disposal. Discharge is accomplished by gravity with the entire liner sliding out of the dumpster. It is ideally suited for heavy powders where dust containment and operational safety are major concerns.

SEA BULK® DUMPSTER LINER

- ✓ **Ideal For The Transport Of:** Baghouse Dust or products with similar characteristics
- 👁️ **Material:** Extruded polyethylene film body
- 📦 **Loading System:** Closed Loop Pneumatic System or Gravity
- 📦 **Discharge System:** Gravity

All Powertex liners are available in various material types. The type of material that will be required for your application will all depend on the type of product that you are shipping and the various characteristics that it has.

Examples of Materials:

- FDA approved virgin grade fully extruded 5.5 mil polyethylene film with metallocene
- FDA approved virgin grade fully extruded 7 mil polyethylene film
- Anti-static polyethylene film (available in both conductive and dissipative)
- Polyethylene/Polyethylene Terephthalate (PE/PET)
- Polyethylene or polypropylene woven material in various grades (95GSM - 230GSM)
- Aluminum laminate (metalized) woven material
- Powerfoil (for use with products that require oxygen and moisture barrier properties)
- Fully extruded polyethylene film with flame retardant properties

NOTE: Material specifications and material samples are available upon request.
