SEA BULK® SHIPPING SOLUTIONS

SEA BULK® BARLESS LINER

This bulk container liner is used for the transport of agricultural products in bulk. It is easily installed with minimal training required and is designed to accommodate virtually any kind of loading system in use such as conveyor belt, screw conveyor, bulk thrower and pneumatic system. The barless liner is desirable to those who are receiving product in bulk, but do not want the inconvenience of disposing of the metal bars that are normally used as bracing with the more well-known conventional liners.

SEA BULK® BARLESS LINER

 **Ideal For The Transport Of:** Barley, Malt, Grains, Peas, Lentils, Beans, Rice, Fish Meal or products with similar characteristics

 **Material:** Sewn woven polypropylene (sift proof seams are available for the shipment of fine powders)

 **Bulkhead:** Flexible coated woven with large zippered load opening

 **Loading System:** Conveyor Belt, Screw Conveyor, Bulk Thrower and Pneumatic System

 **Discharge System:** Gravity fed by cutting open the bottom of the bulkhead

All Powertex liners are available in various material types. The type of material that will be required for your application will all depend on the type of product that you are shipping and the various characteristics that it has.

Examples of Materials:

- FDA approved virgin grade fully extruded 5.5 mil polyethylene film with metallocene
- FDA approved virgin grade fully extruded 7 mil polyethylene film
- Anti-static polyethylene film (available in both conductive and dissipative)
- Polyethylene/Polyethylene Terephthalate (PE/PET)
- Polyethylene or polypropylene woven material in various grades (95GSM - 230GSM)
- Aluminum laminate (metalized) woven material
- Powerfoil (for use with products that require oxygen and moisture barrier properties)
- Fully extruded polyethylene film with flame retardant properties

NOTE: Material specifications and material samples are available upon request.

Manifolds Available:

- One door closed discharge manifold (24")
- Center discharge manifold (31")
- Widemouth discharge manifold (fishtail/tundish)
- Vacuum discharge fitting manifold (6")
