

POWERTEX
SEA BULK® SHIPPING SOLUTIONS

BULK BAGS, FIBC'S, TOTES

Bulk bags are typically utilized where the end user does not have the capability to unload large volumes of product that would be shipped in a 20' or 40' container or if you are shipping a commodity in smaller volumes. Bulk Bags can be manufactured in various grades of woven material including woven with anti-static properties. Bulk Bags can also be lined with Polyethylene Film and Powerfoil Film to eliminate dusting, oxygen and moisture from getting into the product being shipped.

BULK BAGS FIBC'S, TOTES
