SEA BULK® SHIPPING SOLUTIONS

# SEA BULK® POWERFOIL LINER

This bulk container liner is specifically designed for the maximum protection possible when shipping products that are extremely sensitive to oxygen, odor and moisture permeation. Our proprietary 5 layer Powerfoil laminate is recognized worldwide for these types of applications.

# SEA BULK® POWERFOIL LINER

-  **Ideal For The Transport Of:** Hygroscopic materials such as Nylon, ABS, Polycarbonate or products with similar characteristics
-  **Material:** Proprietary 5 layer Powerfoil laminate
-  **Bulkhead:** Flexible coated woven polypropylene with four (4) metal bars for bracing
-  **Loading System:** Pneumatic System
-  **Discharge System:** Gravity Fed via Manifold or Hopper to Take Away System

All Powertex liners are available in various material types. The type of material that will be required for your application will all depend on the type of product that you are shipping and the various characteristics that it has.

## Examples of Materials:

- FDA approved virgin grade fully extruded 5.5 mil polyethylene film with metallocene
- FDA approved virgin grade fully extruded 7 mil polyethylene film
- Anti-static polyethylene film (available in both conductive and dissipative)
- Polyethylene/Polyethylene Terephthalate (PE/PET)
- Polyethylene or polypropylene woven material in various grades (95GSM - 230GSM)
- Aluminum laminate (metalized) woven material
- Powerfoil (for use with products that require oxygen and moisture barrier properties)
- Fully extruded polyethylene film with flame retardant properties

**NOTE: Material specifications and material samples are available upon request.**

## Manifolds Available:

- One door closed discharge manifold (24")
- Center discharge manifold (31")
- Widemouth discharge manifold (fishtail/tundish)
- Vacuum discharge fitting manifold (6")
