# SEA BULK® WALK-IN LINER

This bulk container liner is specifically designed to be loaded and discharged with the entire rear door access open. Common applications are for the protection of packaged goods on pallets, loose loaded mineral products or the prevention of damage to the container from the product being shipped.

# SEA BULK® WALK-IN LINER

**Ideal For The Transport Of:** Packaged goods on pallets including fertilizer, animal feed or similar products

**Material:** Extruded polyethylene film body or woven polypropylene

**Loading System:** Forklift, Bucket Loader or Conveyor System

**Discharge System:** Forklift, Bucket Loader or Tilt

All Powertex liners are available in various material types. The type of material that will be required for your application will all depend on the type of product that you are shipping and the various characteristics that it has.

## Examples of Materials:

- FDA approved virgin grade fully extruded 5.5 mil polyethylene film with metallocene
- FDA approved virgin grade fully extruded 7 mil polyethylene film
- Anti-static polyethylene film (available in both conductive and dissipative)
- Polyethylene/Polyethylene Terephthalate (PE/PET)
- Polyethylene or polypropylene woven material in various grades (95GSM - 230GSM)
- Aluminum laminate (metalized) woven material
- Powerfoil (for use with products that require oxygen and moisture barrier properties)
- Fully extruded polyethylene film with flame retardant properties

**NOTE:** Material specifications and material samples are available upon request.

## Manifolds Available:

- One door closed discharge manifold (24")
- Center discharge manifold (31")
- Widemouth discharge manifold (fishtail/tundish)
- Vacuum discharge fitting manifold (6")
